HENRY PFEIFFER LIBRARY

[Home](#) :: [Library](#)

The Henry Pfeiffer Library is located in the center of the MacMurray campus, with seating for 275 at the time of the building's opening in 1928.

The library provides a wide variety of resources, including micro formats, as well as instructional materials and approximately 125 periodicals in paper format. The library holds approximately 130,000 book volumes and is a selective depository of United States government documents. Internet resources are carefully selected and made available via the MacMurray website to all computers on the MacMurray campus network.

OmniFile Full Text Select

- OmniFile Full Text Select is a general database of journal articles on a variety of topics. It indexes more than 1,600 full-text journals, both scholarly and non-scholarly.
- While this database is considerably smaller than Academic Search Premier, everything in it is full-text. This eliminates the need to request articles through interlibrary loan. You are able to print or save the full text of every article you find in this database.

Title: Exploring the Sociopolitical Dimensions of *Global Warming*

Personal Author: [Sadler, Troy D.](#); [Klosterman, Michelle L.](#)

Journal Name: [Science Activities](#)

Source: [Science Activities](#) v. 45 no. 4 (Winter 2009) p. 9-12

Publication Year: 2009

Abstract: The authors present an activity to help high school students conceptualize the sociopolitical complexity of *global warming* through an exploration of varied perspectives on the issue. They argue that socioscientific issues such as *global warming* present important contexts for learning science and that the social and political dimensions of these issues must be featured along with the underlying science. The activity is structured as a jigsaw in which learners explore multiple perspectives on the issue of *global warming* as they work to develop recommendations for national policy. Reprinted by permission of the publisher.
