The Henry Pfeiffer Library is a full-service library with seating for 275 at the MacMurray campus. The library provides a variety of services, including instruction, and holds approximately 125 micro formats. The library holds approximately 130,000 book volumes and is a selective depository of United States government documents. Internet resources are carefully selected and made available via the MacMurray website to all computers on the MacMurray campus network.

PsycINFO & PsycARTICLES

- PsycINFO is a database from the American Psychological Association (APA) that contains “over 2.5 millions citations and summaries” of “scholarly journal articles, book chapters, books, and dissertations.” Much of the content is in abstract form, but there is a good amount of full-text material.
- PsycARTICLES is a database, also from the American Psychological Association (APA) and from “allied organizations including the Canadian Psychology Association and Hogrefe Publishing Group.” It is considerably smaller than PsycINFO, but everything is full-text.
- Searching in each database works the same, and they use most of the same subject headings.

I will use PsycINFO for this tutorial.

These databases use keyword searching. The words "anger" and "management" will appear somewhere in the record, not necessarily together.

PsycINFO & PsycARTICLES

When we perform this search, we come back with over 1,700 results. It's always a good idea to start your search out broad and narrow it down to find exactly what you are looking for. That way you're less likely to miss anything important. Given the nature of the keyword search, it's usually a good idea to use the subject terms whenever possible. That way we only get the results that are actually about the topic, rather than results that just happen to contain a couple of words.

PsycINFO & PsycARTICLES

The screenshot shows a search results page with a left sidebar and a main content area. The sidebar includes filters for Date, Source Types, Age, Subject: Major Headings, Gender, Subject, and Publication. The 'Subject: Major Headings' section has a red arrow pointing to the 'Anger Control' checkbox. The main content area displays search results with a red callout box containing the following text:

After opening the pull down menu, we see that there isn't a subject heading for "ander management." PsycINFO uses "Anger Control" instead of "Anger Management." If you use these subject terms when you can, you are less likely to miss results that might be useful. Check the box next to the term and click "Update" to get all the entries with this subject heading.

The search results shown include:

- 2. Review of 'Anger, rage & relationship—An empathic approach to anger management'.
Clarke, Neil; Counselling & Psychotherapy Research, Vol 10(1), Mar, 2010, pp. 77-79. [Review-Book]

- 4. Review of 'Anger, rage and relationships. An empathic approach to anger management'.
McArdle, Simon; Therapeutic Communities, Vol 31(1), Spr, 2010, pp. 90-91. [Review-Book]
Subjects: Anger Control
Database: PsycINFO

PsycINFO & PsycARTICLES

After adding a check mark next to the “Anger Control” subject heading, and clicking “Update,” notice that the number of results goes down substantially to around 300. This represents all the entries that have this subject heading attached to them, but also contain the words “anger” and “management.” This still isn’t ideal, and in a minute, I’ll show you how to improve these results, but first we’ll look at ways to narrow our search further.

PsycINFO & PsycARTICLES

The screenshot shows a search results page for PsycINFO. The left sidebar contains search filters, and the main area displays a list of search results. Three red callout boxes with arrows point to specific filters:

- Callout 1:** "If you don't have time to request an interlibrary loan, you can limit your results to only those available in full text." This points to the "Linked Full Text" checkbox in the "Refine your results" section.
- Callout 2:** "If you need the most up to date research, you can use this slider to narrow the date range of your results." This points to the "Publication Date" slider, which is currently set to 2010.
- Callout 3:** "Professors often want scholarly sources. By selecting 'Peer Reviewed Journals,' you will narrow your results to only those that were reviewed by experts in their fields and deemed good enough to publish in the journals." This points to the "Peer Reviewed Journals" checkbox in the "Source Types" section.

The search results list includes:

- 1. The impact of anger management treatment and rational emotive behavior therapy in a public school setting on social skills, anger management, and depression.**
Flanagan, Rosemary; Allen, Korrie; Henry, Donna J.; Journal of Rational-Emotive & Cognitive Behavior Therapy, Vol 28(2), Jun, 2010. Special issue: Journal of Rational-Emotive & Cognitive Behavior Therapy; Rational Emotive Behavior Therapy; School Based Intervention; Social Skills; Childhood (birth-12 yrs); School Age (6-12 yrs); pp. 87-99. [Journal Article]
- 2. Review of 'Anger, rage & relationship—A new paradigm in anger management.'**

PsycINFO & PsycARTICLES

If you are presented with a choice between PDF Full Text and HTML Full Text, it is usually a good idea to opt for PDF. PDF is a scan of the article the way it appears in the journal. They contain page numbers, making them easier to cite, and whatever images, graphs, or tables they contain are in the article where they appear in print. HTML is a scrolling web page without breaks for pages. Images are tacked on at the end, if they are included at all.

PsycINFO & PsycARTICLES

ISSN: 0883-6612 (Print)
1532-4796 (Electronic)

Language: English

Keywords: *anger management* style; emotion suppression; stress; pain; cardiovascular responses; pain-induction

If the article isn't available in full text, scroll down the page to the abstract, or summary, of the article. You can get an idea of whether or not you want to request it through interlibrary loan.

Abstract: Background: Suppression of emotion, *anger* in particular, may be linked to heightened pain intensity during a subsequent painful event, but it is not clear whether an individual's *anger management* style (trait *anger-out* or trait *anger-in*) moderates effects on pain intensity and cardiovascular responses during pain. Purpose: To determine whether (a) trait *anger-out* and/or trait *anger-in* moderate effects of Emotion-Induction (*anger*, anxiety) × Emotion Suppression (nonsuppression, experiential, expressive) manipulations during mental arithmetic on pain intensity and cardiovascular responses during and following a cold pressor pain task, such that "mismatch" relationships emerge (preferred *anger management* style is discrepant from situation demands), and (b) general emotional expressivity accounts for these effects. Method: Healthy nonpatients (N = 187) were assigned to 1 of 6 conditions for a mental arithmetic task. Cells were formed by crossing 2 Emotion-Induction (anxiety, *anger*) × 3 Emotion Suppression (nonsuppression, experiential, expressive) conditions. After mental arithmetic, participants underwent a cold pressor followed by recovery. Systolic blood pressure (SBP), diastolic BP (DBP), heart rate (HR), and pain intensity ratings were recorded. Spielberger *Anger-Expression* Inventory tapped *anger management* style. Results: General Linear Model procedures tested Emotion-Induction × Emotion Suppression × *Anger-Out* or *Anger-In* (continuous) × Period (baseline, cold pressor, recovery) effects on pain intensity, SBP, DBP, and HR. A 4-way interaction emerged for pain intensity: Only for those in the *anger-induction*/experiential suppression condition, *anger-out* was related significantly to pain recovery. Three-way interactions emerged for SBP and DBP: Only for those in expressive suppression condition, *anger-out* was related significantly to SBP during and following cold pressor and to DBP following cold pressor. General emotion expressivity did not account for *anger-out* effects. Conclusions: A mismatch situation may apply for high *anger-out* people who suppress emotion in a certain circumstance and thus may suffer greater discomfort and physiological responsiveness to subsequent pain than high *anger-out* people not having to suppress. Angst Use Anxiety		
Anguish Use Distress		

I searched for anger management and found out that this database uses "Anger Control" as a subject term in its place.

PsycINFO & PsycARTICLES

The screenshot shows the PsycINFO database interface. At the top left is the EBSCO logo. The search bar contains the text "DE 'Anger Control'". Below the search bar are "Search" and "Clear" buttons. Navigation links include "Basic Search", "Advanced Search", "Visual Search", and "Search History".

Below the search bar is a "Browsing: PsycINFO -- Thesaurus" section. It features a text input field with "anger management" and a "Browse" button. There are three radio buttons: "Term Begins With" (selected), "Term Contains", and "Relevancy Ranked".

Below the browsing section is a table of terms. The table has columns for "Select term, then add to search using:", "OR" (dropdown), "Add", "Explode", and "Major Concept". The first row is "Anger Control", which has a checked checkbox in the "Select term" column and an empty checkbox in the "Major Concept" column. Below it are "Anger Management Use Anger Control", "Angina Pectoris", "Angiography", and "Angiotensin", each with an unchecked checkbox in the "Select term" column.

A red box highlights the "Add" button and the "Anger Control" row. A red callout box contains the text: "After clicking on 'Anger Control,' I simply put a check in the box next to the term I want to use and add it to my search." Red arrows point from the callout box to the "Add" button and the "Anger Control" row.

MacMurray COLLEGE logo is visible in the top right corner.

PsycINFO & PsycARTICLES

The screenshot displays the EBSCO PsycINFO search interface. At the top left, the EBSCO logo is visible. The search bar contains the term "DE 'Anger Control'" and is set to search in "Select a Field (optional)". Below the search bar, there are options for "AND" and "Add Row". The search results page shows 645 results for the search term "Anger Control". The results are sorted by Relevance. The first result is "Maternal emotion coaching, adolescent anger regulation, and siblings externalizing symptoms." by Shortt, Joann Wu; Stoolmiller, Mike; Smith-Shine, Jessica N.; Mark Eddy, J.; Sheeber, Lisa; Journal of Child Psychology and Psychiatry, Vol 51(7), Jul, 2010. pp. 799-808. [Journal Article]. The second result is "The impact of anger management treatment and rational emotive behavior management, and depression." by Flanagan, Rosemary; Allen, Korrie; Henry, Donna J.; Journal of Rational-Emotive & Cognitive-Behavior Therapy. pp. 87-99. [Journal Article]. A red box highlights a text box on the right side of the page that reads: "Here we have over 600 results that are about 'Anger Control.' Notice that this is almost double the number our previous search turned up. By using only the subject term, we have added the results that are about anger control, but do not contain the word 'management.' If you already know what you are looking for, the Thesaurus can save time sifting through irrelevant results." The interface also includes a "Refine your results" section with checkboxes for "Linked Full Text", "References Available", and "Peer Reviewed", and a "Source Types" section with checkboxes for "All Results", "All Journals", "Peer Reviewed Journals", and "Books/Monographs".
